

LED Street Light

Invest in Reliability & Effectiveness

Street Light

Description

- High efficiency , High brightness silicon solar cell
- During the day, solar panel of the LED solar street light receive the energy from the sun
- Converting to electrical energy and use it
- Also save it to the battery, put into use for the LED street light for use in the night .
- It cost saving and environmental friendly
- It is shock & vibration resistant
- Suitable for use in pavement, park or open area.

Features

- High efficiency
- AC , DC Version
- Shock & vibration resistant
- IP66 & IK08 Rating
- Excellent heat dissipation protection

Benefits

- Energy saving & environmentally friendly
- Power outages protection, low accident risk
- Superior service life
- Maximum effectiveness over service life
- Less Maintenance Cost

LED STREET LIGHT

(AC Version)

35W-210W

(DC Version)

35W-100W
